

Seismic qualified

Eaton Corporation's equipment identified below was tested for seismic withstand capability and tested in accordance with the combined requirements specified in the International Building Code, the California Building Code, and the Uniform Building Code.

As required by the codes, the equipment demonstrated its ability to function after the seismic tests. The seismic capability of the equipment is illustrated in the figure below.

9355 20 to 30 kVA Uninterruptible Power Supplies & Options Cabinets

The frequency sweep tests revealed that the lowest equipment natural frequency is:

6.4 Hz
