Cost Effective

Pelco's Spectra® Pro Series 2 is an ideal, cost-effective solution for common applications. The Spectra Pro Series 2 is easy to order, easy to install and ready to get you focused on what matters most in your organization.

Full High Definition Camera

Spectra Pro Series 2 is ideal for common applications such as commercial, corrections, education, gaming and healthcare requiring a broad coverage areas with fewer cameras, Spectra Pro Series assures coverage of large areas without the need for PTZ management by live operator. Low latency and smooth PTZ, the camera is easy to control with a joystick for high performance tracking of objects. It provides a wide angle with 360° continuous pan rotation to cover expansive areas with 2MP and 30x optical zoom to get details.

Embedded Features

Included in all models are built in video analytics (e.g. Professional Analytics Suite including: Loitering Detection, Object Counting, Motion Detection, Camera Sabotage, and Audio Detection). Spectra Pro Series 2 also allows for up to 8 configurable privacy zones. White Balance modes including Auto or

Manual are available for overcoming difficult lighting conditions day and night. Spectra Pro Series 2 supports up to 2 TB of onboard local storage (not supplied) that is easily accessible through the ONVIF Profile G protocol or FTP.

Video Encoding

Spectra Pro Series 2 provides three methods of video encoding: H.265 Main profile, H.264 High/Main/Baseline profiles and MJPEG. Latest generation H.265 compression lowers bandwidth and storage requirements by up to 70% while retaining resolution and image quality and critical information for forensic purposes.

Intuitive Design

Spectra Pro Series 2 features the same ease of installation and maintenance that you have come to expect from Spectra as well as flexible power options to fit into existing or new infrastructure.

VMS Integration

Spectra Pro Series 2 easily connects to Pelco VideoXpert and provides limited support of legacy systems such as Endura 2.0 (or later), and Digital Sentry 7.3 (or later).

Pelco endeavors to be the most open and integrated camera provider in the industry and as a part of that effort Spectra Pro Series 2 is integrated with a long and ever-growing list of 3rd party software and Video Management Systems (VMS).

Pelco Pro Analytics Suite

Spectra Professional range cameras feature the Pro suite of video analytics including Motion Detection, Loitering Detection, Camera Sabotage, Audio Detection, and Object Counting.

- **Simple Motion Detection** algorithms allow the camera to record or send an alarm when there is motion detected in a selected zone or with the entire scene.
- **Loitering Detection:** Identifies when people or vehicles remain in a defined zone too long. This behavior is effective in real-time notification of suspicious behavior.
- A **Camera Sabotage** alarm is triggered if the lens is obstructed or when the camera is repositioned.
- **Audio Detection** allows user to define an audio intensity threshold to trigger surrounding audio.
- **Object Counting** counts the number of moving objects passing through the defined virtual lines.

Pelco's Smart Compression Technology

Pelco's Smart Compression Technology lowers bandwidth and storage requirements by up to 70%, while reducing storage requirements. Our technology allows the user to make informed optimization between storage savings and image quality.

Pelco's Smart Compression Technology dynamically analyzes motion occurring within live video in real-time, to intelligently compress the information you don't need, while retaining details with clear quality in the areas that are important in the scene. By enabling Dynamic GOP, an added feature of Smart Compression, the number of I-frames are automatically reduced in scenes with low motion. Based on the complexity of scenes and motion occurring, such as a store room that has limited entry and exit, up to 70% bandwidth savings can be achieved.
