

# FLIR **K33 & K53**

## Thermal Imaging Cameras for Firefighters

# STREAMLINED HIGH PERFORMANCE MADE EVEN MORE AFFORDABLE

FLIR's new K33 and K53 provide you with two new lower-cost, easier-touse options without sacrificing the reliable clarity and performance that FLIR K-Series TICs are well-known for. Both feature FLIR's FSX™ Flexible Scene Enhancement that intensifies structural and textural details in thermal images for better perspective and orientation.

By making it easier to see more clearly under the smokiest, darkest conditions, the K33 and K53 can help improve situational awareness and provide first responders a greater sense of confidence and safety as they forge ahead to fight fires and save lives.

#### **Fire Power Simplified**

Simple operation lets you stay focused on the job. A single, glove-friendly button gets you up and running. A squeeze of the trigger freezes a K33 image or captures K53 stills and videos for reviewing later.

### **Uncompromising Resolution**

Higher-resolution thermal imaging once exclusive to FLIR Kx5 models is now available in a streamlined package. Choose the K33 for  $240 \times 180$  pixel IR or the K53 for  $320 \times 240$  guality.

#### Vivid FSX™ Thermal Images

A big, bright 4" LCD and onboard FSX digital processing enhances thermal image detail for greater visibility, making it easier for firefighters to find their way. 60Hz frame rate keeps up with the action.

#### **Affordability Redefined**

At \$2,895 USD for the K33 and under \$5K for the K53, FLIR offers the broadest cost-effective range of high performance TICs to help you stretch your budget and put these essential tools into more hands.\*

#### The Best Warranty

FLIR's unique 2-5-10 Warranty covers the battery for two years, parts and labor for five, and the thermal imaging detector for 10.

\* Prices are subject to change.
